- ⇒ Inhaltliche Zusammenfassung:
In 'This Sporting Life', Robert Colls explains sport as one of England's great civil cultures. The lived experiences of people from all walks of life are reclaimed to tell England's history through its great sporting cultures, from the horseback pursuits of the wealthy and politically connected, to the street games in working-class neighbourhoods which needed nothing but a ball. It observes people at play, describes how they felt and thought, carries the reader along to a match or a hunt or a fight, draws out the sounds and smells of humans and animals, showing that sport has been as important in defining British culture as gender, politics, education, class, and religion.

In July 1950, a young Dutch intersex woman was expelled from elite competition by the International Amateur Athletic Federation. It turned out to be the beginning of a dark era in the history of women in sport. Dozens of intersex athletes were suspended, although no fraud was ever uncovered. Suspension had pernicious effects on their lives. They hardly appeared in public, lived in solitude, committed suicide or attempted to. Biographies of these banned athletes highlight the unfair play of gender verification and of their exclusion from competition.

⇒ Inhaltliche Zusammenfassung:

Although there is significant research on large events that take place within athletics, small-scale events are largely ignored, in part due to the lack of press that they generate. However, these events require planning and preparation in the same way that larger sporting events do. This disparity between the effort that goes into the event and the attention the event draws allows for a gap in strategy or information available to those planning smaller scale athletic events. Principles and Practices of Small-Scale Sport Event Management is a cutting-edge reference publication that examines the successful organization and planning of small-scale sporting events. Featuring a wide range of topics such as community engagement, event planning, and sports management, this book is ideal for event planners, sports managers, marketers, academicians, practitioners, industry professionals, researchers, event organizers/coordinators, and students..

Introduction – A genealogy of dance modernity: Movement artifacts, mythic principles, and archival others – The critical reception of Serge Lifar (1929-1939) – The dancer as statue and the geo-politics of neoclassicism – Parade as a critical concept in interwar dance theory: From Jean Cocteau and Paul Valery to Andre Varagnac – Serge Lifar and the question of collaboration with the German authorities under the occupation of Paris (1940-1949) – From the neoclassical turn to the Baroque re-turn.

⇒ Zweite inhaltliche Zusammenfassung:

”This book is an examination of neoclassical ballet initially in the French context before and after World War I (circa 1905-1944) with close attention to dancer and choreographer Serge Lifar. Since the critical discourses I analyze indulge in flights of poetic fancy I distinguish in my discussion of this material between the Lifar-image (the dancer on stage and object of discussion by critics), the Lifar-discourse (the writings on Lifar as well as his own discourse), and the Lifar-person (the historical actor). This topic is further developed in the final chapter into a discussion of the so-called Baroque dance both as a historical object and as a motif of contemporary experimentation as it emerged in the aftermath of World War II (circa 1947-1991) in France. Using Lifar as a through-line, the book explores the development of critical ideas of neoclassicism in relation to his work and his drift toward a fascist position that can be traced to the influence of Nietzsche on his critical reception. Lifar’s collaborationism during the Occupation confirms this analysis. My discussion of neoclassicism begins in the final years of the nineteenth-century and carries us through the Occupation; I then track the Baroque in its gradual development from the early 1950s through the end of the 1980s and early 1990s.”-

Lee, Shannon: Be water, my friend

the teachings of Bruce Lee / Shannon Lee. First undSeiten edition 2020. 229 Seiten. ISBN 978-1-250-20668-8

⇒ LC (Library of Congress Classification):

- GV1101

⇒ Der Titel wird **beschafft**.

⇒ Inhaltliche Zusammenfassung:

"Bruce Lee's daughter illuminates her father's most powerful life philosophies-demonstrating how martial arts are a perfect metaphor for personal growth, and how we can practice those teachings every day. "Empty your mind; be formless, shapeless like water." Bruce Lee is a cultural icon, renowned the world over for his martial arts and film legacy. But Lee was also a deeply philosophical thinker, learning at an early age that martial arts are more than just an exercise in physical discipline-they are an apt metaphor for living a fully realized life. Now, in Be Water, My Friend, Lee's daughter Shannon shares the concepts at the core of his philosophies, showing how they can serve as tools of personal growth and self-actualization. Each chapter brings a lesson from Bruce Lee's teachings, expanding on the foundation of his iconic "be water" philosophy. Over the course of the book, we discover how being like water allows us to embody fluidity and naturalness in life, bringing us closer to our essential flowing nature and our ability to be powerful, self-expressed, and free. Through previously untold stories from her father's life and from her own journey in embodying these lessons, Shannon presents these philosophies in tangible, accessible ways. With Bruce

Lee's words as a guide, she encourages readers to pursue their essential selves and apply these ideas and practices to their everyday lives-whether in learning new things, overcoming obstacles, or ultimately finding their true path. *Be Water, My Friend* is an inspirational invitation to us all, a gentle call to action to consider our lives with new eyes. It is also a testament to how one man's exploration and determination transcended time and place to ignite our imaginations-and to inspire many around the world to transform their lives"-.

⇒ Inhaltliche Zusammenfassung:

"Positive Pedagogy is an athlete centred, inquiry based approach that transforms the way we understand learning and coaching in sport that can be successfully employed across a range of different sports and levels of performance. Applied Positive Pedagogy in Sports Coaching: International Cases reflects the uptake of it by coaches across different countries and sport settings through its complete focus on their experiences of using it and adapting it to their needs and contexts. Comprising of seventeen detailed chapters that examine both Team Sports (part one) and Individual Sports (part two), This book seeks to provide insight into the opportunities and challenges involved in the application of Positive Pedagogy for sport coaching (PPed). Critically, it also identifies any problems they encountered, how they addressed them and what they learned from these experiences. Acting as complementary text to the successful Positive Pedagogy for Sport Coaching second edition, Applied Positive Pedagogy in Sports Coaching: International Cases is an exciting, applied text that will be of vital reading for all practising sports coaches or physical education teachers looking to improve or even transform their professional practice as well as sports coaching students and researchers"-.

- ⇒ Zweite inhaltliche Zusammenfassung:

"Triumphant wins, gut-wrenching losses, last-second shots, underdogs, competition, and loyalty—it's fun to be a fan. But when a football player takes a hit to the head after yet another study has warned of the dangers of CTE, or when a team whose mascot was born in an era of racism and bigotry takes the field, or when a relief pitcher accused of domestic violence saves the game, how is one to cheer? Welcome to the club for sports fans who care too much. In *Loving Sports When They Don't Love You Back*, acclaimed sports writers Jessica Luther and Kavitha A. Davidson tackle the most pressing issues in sports, why they matter, and how we can do better. For the authors, "sticking to sports" is not an option—not when our taxes are paying for the stadiums, and college athletes aren't getting paid at all. But simply quitting a favorite team won't change corrupt and deplorable practices, and the root causes of many of these problems are endemic in our wider society. An essential read for modern fans, *Loving Sports When They Don't Love You Back* challenges the status quo and explores how we might begin to reconcile our conscience with our fandom"–.

"Athletes: From Performance Analysis to Injury Prevention opens with a study aiming to assess innovative theoretical approaches for studying human opportunities in sports where maximum achievement is caused by modern technology. The authors discuss the macro- and micro-nutrient requirements that must be followed by the athlete, depending on the athlete's total daily energy expenditure, the type of sport, their gender and environmental conditions. Subsequently, the components of a proper bike fit are explored, focusing on the three interfaces a human has with a bike: foot-pedal, pelvis-saddle, and hands-handlebar. Equipment needs, bike anatomy, and the process of performing a bike fit are reviewed. Lastly, the authors propose to identify at-risk women's team sport athletes by identifying psychological perceptions of high vs. low injuries and/or fatigued athletes"–.

Warm up: the tunnel vision of the doping debate – Doping and health – Doping and the spirit of sport – Doping and role models – Doping and coercion – Doping and the wish for a doping-free sport – Doping and fair competition – Doping and onwards: a run-off heat from the 4th division..

⇒ Zweite inhaltliche Zusammenfassung:

"In this provocative and thought-provoking book, Professor of Ethics Thomas Søbirk Petersen explains why the World Anti-Doping Agency's doping rules are poorly justified and makes a case for a new third way in anti-doping policy that would allow athletes to use substances and methods currently on WADA's prohibited list. The book identifies, clarifies and challenges the central arguments that are used in the often highly-emotional debates around doping, and argues strongly that open dialogue about doping is essential as it defines the territory in which athletes, physicians, managers, coaches and pharmaceutical companies can operate safely. It is rooted in the theory of ethics and illustrated with real cases, examples and experiences from sport at all levels, from the auto-biographical to some of the most high-profile doping cases in history. This is an essential addition to the bookshelves of researchers and students of sports studies like sports philosophy, sports law, sports medicine and the sociology of sport, and a fascinating read for anybody interested in the darker side of sport and in its possible futures"-.

⇒ Inhaltliche Zusammenfassung:

"During the Cold War, the governments of the United States and the Soviet Union developed cultural exchange programs, in which they sent performing artists abroad in order to generate goodwill for their countries. Ballet companies were frequently called

on to serve in these programs, particularly in the direct Soviet-American exchange. This book analyzes four of the early ballet exchange tours, demonstrating how this series of encounters changed both geopolitical relations and the history of dance. The ballet tours were enormously popular. Performances functioned as an important symbolic meeting point for Soviet and American officials, creating goodwill and normalizing relations between the two countries in an era when nuclear conflict was a real threat. At the same time, Soviet and American audiences did not understand ballet in the same way. As American companies toured in the Soviet Union and vice-versa, audiences saw the performances through the lens of their own local aesthetics. Ballet in the Cold War introduces the concept of transliteration to understand this process, showing how much power viewers wielded in the exchange and explaining how the dynamics of the Cold War continue to shape ballet today”-.
